

Source code repository

Bareos source on [github](#)

Packages

Binary packages

We have created repositories with binary packages for all major linux distribution (Univention Appcenter see below) and Windows Installers for (32 Bit and 64 Bit).

Please follow this link to the repositories:

<http://download.bareos.org/bareos>

Major

We publish the first version of each **major** release here: <http://download.bareos.org/bareos/release/latest/>. Please follow our [mailinglists and bugtracker](#) for known issues.

If you are looking for continuously maintained packages with quality assurance for your production, please visit www.bareos.com for more information about our subscription and support services.

All source code will always be available on [GitHub](#).

Experimental

Get the latest **experimental** versions (made from nightly builds) here: <http://download.bareos.org/bareos/experimental/nightly/>

Nightly means: whenever new code is pushed to the master GitHub repository, packages will be built, tested and published during the following night.

Univention App Center / UCS Bareos Appliance

Univention is the most important producer of Open Source complete solutions, the Debian based enterprise Linux distribution Univention Corporate Server (UCS), identity and infrastructure management systems and groupware and desktop solutions in the German-speaking world.

Bareos can be installed on UCS systems with just one click, using the Univention [App Center](#). Once installed, it fits into the Univention Management Console (UMC), meaning that you can include every managed client into the Bareos server configuration.

There are also ready to use appliances with Bareos on UCS available in the App Center for VMware, VirtualBox and KVM.

Gentoo Portage

Gentoo Linux user find package description in the portage tree:
<http://packages.gentoo.org/package/app-backup/bareos>

FreeBSD Ports

FreeBSD ports available
at <http://www.freshports.org/search.php?query=bareos>

Appliance / Virtual Machine

If you want to try Bareos in a quick and easy way, we can offer you a ready-to-use [Bareos-appliance](#). The appliance features a ready-to-use installation including the webui. It is easiest to be used inside [VirtualBox](#) via the "Import appliance" option.

Currently the appliance contains Bareos in version 16.2.4.

Get the appliance here:

https://mirror.netcologne.de/bareos.org/try-bareos/bareos_16.2_64_bit.x86_64-16.2.4.ovf.tar.gz
