Bareos 18.2.5 is out!

2019-01-29 17:47

Final Version available

We're happy to announce that 18.2.5 is now stable! The Bareos team spent the last few weeks with a lot of testing and analyzing the network traffic to make sure the new network protocol works. We've also updated the documentation and fixed the Python-Bareos module (so it works with the new 18.2.5).

For a detailed list of all features, please have a look at the official [press release](#).
