Maintenance Update (18.2.6)

2019-02-14 12:20

The first release update solves a TLS-Cert problem in the WebUI that occurs with older PHP versions (5.4.x). We've also addressed a bareos-dbcheck performance issue with orphaned path entries.

The source code of 18.2.6 is available on [GitHub](#). Linux, macOS, FreeBSD, and Windows packages for [subscription customers and partners](#) have been published in the [subscription repository](#).
