Bareos workshop at opsiconf

2020-01-09 14:51

While the actual conference is happening on March, 3, the organizers are offering several workshops on the day before. From 3 to 5pm, Jörg Steffens (Bareos developer and one of the managing partners of Bareos GmbH & Co. KG) is giving an overview of Bareos (in German language). In the end, participants should have a working backup system including web frontend and 1 or 2 connected clients in a virtual Linux environment. If you're interested, please register via the [opsiconf website](#).
