Bareos at SCaLE 17x

2019-02-11 13:02

SCaLE is the largest community-run Open Source/Free Software conference in North America. SCaLE 17x expects to host 150 exhibitors, along with nearly 130 sessions, tutorials and special events. Bareos is also part of this year's [exhibition](#). From Thursday to Sunday you can find us in the booth next to our technology partner [opsi](#).

Maik Außendorf (one of Bareos' managing directors) is also giving a talk: "[Last Line of Defence: be prepared by Open Source Backups with Bareos](#)" gives an introduction to the Open Source backup solution Bareos and shows how to use it in a heterogeneous network (Saturday, March 9, 2019, 18:00 to 19:00, room 101).

Bareos is happy to support the event as Silver Sponsor. We have four spare tickets to give away. If you'd like to meet us in Pasadena between March 7 and 10, please get in touch via our [website](#). The **free tickets** go to the first four people who contact us.
